	Single-stage, close-coupled, volute twin-head pump with in-line suction and discharge ports of identical diameter. The twin-head pump is designed with two parallel power-heads.					
	The pump is of the top-pull-out design, i.e. the power head (motor, pump head and impeller) can be removed for maintenance or service while the pump housing remains in the pipework.					
	Each power head is fitted with an unbalanced rubber bellows seal.					
		I 12756. Pipework connection is via PN 16 DIN flanges (EN 1092-2 and ISO 7005-2).

	Each power head is fitted with a efficiency is classified as IE5 in a	fan-cooled, permanent-magnet synchronous motor of identical size. The motor accordance with IFC 60034-30-2				
		converter and PI controller in the motor terminal box. This enables continuously				
	variable control of the motor spec	ed, which again enables adaptation of the performance to a given requirement.				
	The pump is fitted with a differential pressure sensor.
