	CUE is a complete range of external frequency converters designed for speed control of a wide range of Grundfos pumps. CUE has a built-in PI controller and offers the same functionality and user-interface as Grundfos E-pumps. CUE solutions can thus be seen as an extension to the E-pump range.					
	By choosing a CUE-solution, you will get the following benefits:					
	 Grundfos E-pump functionality and user-interface application- and pump-family-related functions 					
	 increased comfort compared to fixed-speed pumps 					
	 very easy installation and commissioning compared to standard frequency converters speed control of pumps up to 250 kW 					
	- speed control of pumps installed in potentially explosive environments.					
	CUE offers the following inputs and output: - RS-485 GENIbus					
	- an analog 0-10 V input for external setpoint					
	 an analog 0/4-20 mA input for sensor four digital inputs for various functions, for instance external start/stop 					
	- two signal relays (C/NO/NC).					
	Accessories:					
	Input/output add-on board					
	Provides additional input: - one 0/4-20 mA analog input for an additional sensor					
	- one 0-20 mA analog output					
	- two inputs for Pt100/Pt1000 temperature sensors, for instance for bearing monitoring.					
	Motor filters:					
	For reduction of dU/dt and peak voltages to the motor windings and for reduction of the acoustic noise generated in the motor, a number of motor filters are offered:					
	- dU/dt filters , 11-250 kW					
	- Sine wave filters, 0.55-250 kW.
