	CUE is a complete range of external frequency converters designed for speed control of a wide range of Grundfos pumps. CUE has a built-in PI controller and offers the same functionality and user-interface as Grundfos E-pumps. CUE solutions can thus be seen as an extension to the E-pump range.					
	By choosing a CUE-solution, you will get the following benefits: - Grundfos E-pump functionality and user-interface - application- and pump-family-related functions					
	 increased comfort compared to fixed-speed pumps very easy installation and commissioning compared to standard frequency converters speed control of pumps up to 250 kW speed control of pumps installed in potentially explosive environments. 					
	CUE offers the following inputs and output: - RS-485 GENIbus - an analog 0-10 V input for external setpoint					
	 an analog 0/4-20 mA input for sensor four digital inputs for various functions, for instance external start/stop two signal relays (C/NO/NC). 					
	Accessories: Input/output add-on board					
	Provides additional input: - one 0/4-20 mA analog input for an additional sensor - one 0-20 mA analog output the input for D1000 terms and the instance for hearing manifesting.					
	 two inputs for Pt100/Pt1000 temperature sensors, for instance for bearing monitoring. Motor filters:					
	For reduction of dU/dt and peak voltages to the motor windings and for reduction of the acoustic noise generated in the motor, a number of motor filters are offered: - dU/dt filters , 11-250 kW					
	- Sine wave filters, 0.55-250 kW.
