| | GRUNDFOSX | er from actual product |
| | Product No.: 99877189 | |
| | The LC 241 level controllers offer a comprehensive range of fe water and drainage | eatures for control and monitoring of pumps in waste |
| | systems or tank filling in water supply. The LC241 is a metal o customization according to your needs. | r plastic cabinet solution offering modularity and |
| | The LC 241 pump controllers are designed for level control, m one pumps | onitoring and protection of Grundfos pumping systems |
| | or two pumps starting direct-on-line, star delta or as soft started. The LC 241 pump controllers can be used in various type of e tank filling in water supply. | |
| | The set-up of the control is easily done either by the predefine start-up wizard in the intuitive Grundfos GO app, using Blueton With the Grundfos GO app, all detailed pump settings can be | oth Smart technology. |
| | The controller is equipped with configurable input/output termi However, as option the IO 241 module with more input/output Additional options like manual ON/OFF/AUTO switch, current input, | options can be build-in. |
| | fault light, can also be part of your customized solution. | |
| | Daily control, supervision and commissioning is straightforwar This saves you valuable time when getting started, and in you The controller integrates seamlessly into the Grundfos range of easy fit into any supervisory system such as SCADA or Grund | r daily interaction with pumps and the controller. of communication modules, ensuring an |
| | The controller maintains a detailed alarm and warning log with The alarm log can be accessed remotely via SCADA or Grund You can also use Grundfos GO to inspect the logs in localized measures at the pumping station. | fos CLOUD. |
| | The LC 241 controller enable: | |
| | Control of 1 or 2 pumps based on signals from sensor input (digital, float switch) | analog, 0-5 V, 0.5-3.5V, 0-10 V, 0-20 mA, 4-20 mA or |
| | Support up to five control levels for both analogue level trans Supports simple application where only one float switch is pr Configurable input/output terminals that can be used as digit for flexible use in the actual application. | esent - single float switch operation |
| | Prevent the pumps with anti-seizing from choking or seizing Prevent the mains load when several pumping stations are s Protection against water hammer as quick restart/simultanec Selection of automatic alarm resetting Setting of stop delays matching the actual operating condition | tarted up at the same time with power-on delay. us start is blocked and delayed |
