## MAXI AP | PRESSURISATION UNITS

The MAXI AP microprocessor controlled single or twin pump pressurisation unit is purpose designed with both the specifier and installer in mind.

This pressurisation unit is exceptionally easy to install and commission and is housed in a compact and robust, floor standing enclosure.

Suitable for maintaining pressure in large domestic and commercial sealed heating systems, chilled water systems, refrigeration units and industrial cooling systems.

Now available in right-hand configurations.

### Features

- Suitable for sealed systems of up to 300,000 litres
- Automated system fill and top-up
- Precise pressure control
- Digital control system and LCD graphic display
- Ai100 technology, engineered by Stuart Turner Ltd, offers unparalleled control and integration for modern systems
- Full status indication
- Sturdy powder coated steel casing
- High quality peripheral pump(s)
- Available up to 3.9 – 8.0 bar cold fill pressure
- All models are Enhanced and are fully compatible with Building Management Systems
- 4 programable BMS volt-free relays
- Modbus RTU BMS interface

### Features

- Self diagnostic electronics
- Designed and built to latest CE requirements and in accordance with ISO9001
- Leak detection via frequency of starts alarm
- Available in left or right-hand configurations
- Suitable for floor mounting
- Category 5 backflow protection, Type AB air gap, weir overflow and warning pipe
- Single (duty) or twin (duty/standby) pump options
- Adjustable Feet

### Applications

- Maintaining system pressure in large domestic and commercial sealed heating systems
- Maintaining system pressure in chilled water systems, refrigeration units and industrial cooling systems
