

ECO-BOOST+

COLD WATER BOOSTER SET

Trebles ECO-BOOST+ combines energy efficiency and performance whilst minimising space requirements. Manufactured with over 50 years of experience, this unit is a high quality, fully featured solution to your water boosting requirements.

Once installed the system pressure will constantly be monitored via a pressure transducer. When an outlet has been opened and a pressure drop is detected, the unit will automatically start and maintain the desired set point. Variable speed drives will only run the pump at the speed required thus saving huge amounts of energy compared to traditional methods of pump control. The touchscreen HMI combines intuitive navigation and monitoring whilst also providing BMS communication including MODBUS.

The ECO-BOOST+ range uses the latest vertical multi-stage, stainless steel pumps equipped with IE3 motors in accordance with EN standards to ensure comfort, reliability and maximum energy efficiency.
