

Guardian High-Level Alarm Remote Warning Beacon

Description

This waterproof flashing alarm beacon provides a clear visual indication for remote alarm or status signalling.

Designed for reliable operation in demanding environments, the beacon features a waterproof construction, making it suitable for outdoor installations or areas subject to washdowns.

The Guardian beacon emits a flashing light to ensure high visibility and rapid recognition of alarm conditions.

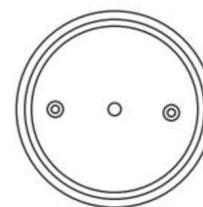

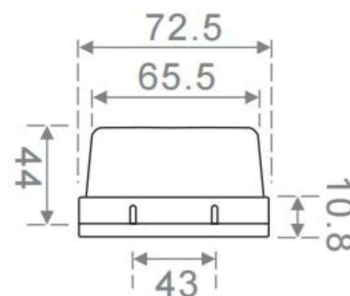

The unit can be easily mounted to any flat surface for quick and secure installation.

The beacon can also be used in conjunction with our Guardian alarm system, providing a clear visual indication when an alarm condition is triggered.

Available in red or amber, with a choice of 30cm lead or 5m lead to suit different installation requirements.

Dimensions

(mm)
